Introduction and Overview

The Plant Breeding Distance Education Program in the Department of Soil and Crop Sciences is designed to provide students with an understanding of the sciences of plant breeding and genetics, and to prepare the student for a career in improving food, feed, fiber, biostock, and recreation/aesthetic plant production across the globe. This program seeks to provide quality plant breeding education and research training to people employed in related agriculture industries while accommodating their demanding lifestyles. The objective of this program is to provide the opportunity to gain advanced degrees in plant breeding for:

1. Industry professionals within the U.S., who cannot come to campus for classes but wish to continue their education and professional development while remaining employed;
2. International industry professionals and non-governmental organizational (NGO) professional individuals who wish to continue their education in the field of plant breeding but who cannot come to campus or cannot come for extended periods of time;
3. Industry leaders who want to improve their knowledge of plant breeding and genetics.

All distance learning students will be enrolled in the same classes as on-campus students and all classes will be taught by the same professors with identical course material, homework, exams, etc. Student research can be completed at the student’s location under the supervision of an on-site Ph.D. scientist, educator, or supervisor who qualifies as an adjunct member of the Texas A&M graduate faculty.

Departmental Mission

The mission of the Department of Soil and Crop Sciences (hereafter referred to as the Department) is:

- To prepare students for careers in soil-, plant-, and environmentally related disciplines;
- To discover scientific knowledge and to develop technologies to sustain environmentally sound and profitable production systems;
- To ensure that technology development and transfer to user clientele and society in general is effective and timely;
- To promote wise use, management and stewardship of soil, plant, and water resources.

Graduate education is essential to meeting this mission. Graduate students are an extension of professorial research efforts which in turn provides the necessary practical training for the next generation of research scientists. Courses are designed to provide a logical progression of learning the technical aspects within each of the Department’s disciplines. In addition to the Agronomy, Plant Breeding, and Soil Science programs, the Department is home for the Molecular and Environmental Plant Sciences (MEPS) program. The Department also houses faculty who are members of the Food Science and Technology, Genetics, and Water Management and Hydrological Science programs intercollegiate faculty.
Graduate Policies and Procedures

Plant breeding programs in Soil and Crop Sciences seek to alter the genetic composition of plants to improve crop characteristics. Our plant breeding and genetics faculty members rely on conventional and molecular breeding techniques to modify specific targets such as yield potential, crop quality, biotic and abiotic stress resistance, and/or reduced crop production costs. Breeders of grain crops such as corn, wheat, sorghum, and rice have developed varieties that have improved grain yield, resist diseases and insect pests, resist lodging, and possess improved nutrition or processing quality. Our faculty have developed genotypes of bioenergy crops such as sweet sorghums, sugar cane, forage sorghums, and perennial grasses with exceptional sugar production per unit land area for ethanol production or biomass for cellulosic ethanol production. Cotton breeders and geneticists in Soil and Crop Sciences have developed unique interspecies lines through hybridization of different species of cotton as well as developed strains with exceptional fiber quality and drought tolerance. Our plant breeding faculty work with sugar cane, rice, cotton, corn, wheat, oat, sorghum, perennial grasses, turf grasses, forage legumes, and peanut.

The faculty and staff of the Department of Soil and Crop Sciences will make every effort to ensure that your experience as a graduate student in our department is challenging, rewarding, and preparatory for a career plant breeding. Additional graduate information, along with the forms necessary for the various aspects of your graduate career can be found at the Office of Graduate Studies (OGS) website http://ogs.tamu.edu.

Revised—August 2012
Plant Breeding Distance Graduate Degrees Available

- **M.S. Non-thesis Option** – requires completion of internship activity
- **MS Thesis Option** – requires a thesis dealing with original research
- **Ph.D.** – requires a dissertation dealing with original research

Scholastic Requirements

This document summarizes policies and procedures to be followed by graduate students in Soil and Crop Sciences. Students should consult the Graduate Catalog or the Office of Graduate Studies as the final authority on all matters discussed in the handbook.

Grade Point Average

Graduate students must maintain a grade point average (GPA) of 3.0 (4.0 scale) for all courses which are listed on the degree plan; as well as for all graded graduate and advanced undergraduate course work (300 and 400 level) completed at Texas A&M and eligible for application toward a graduate degree. Graduate students will not receive graduate degree credit for undergraduate courses taken on a satisfactory/unsatisfactory (S/U) basis. Graduate courses on the degree plan may not be taken S/U, except for 681, 684, 690, 691, 692, 693, 695, and 697. Graduate courses not on the degree plan may be taken S/U.

If either a student’s cumulative GPA or the GPA for courses listed on the degree plan fall below 3.0, he or she will be considered scholastically deficient and may be dropped from the University unless the minimum GPA is attained by the end of the next long semester. Various scholarships have varying requirements for minimum GPA in order to retain the scholarship.

Additional information can be found in the Texas A&M University Graduate Catalog, which can be found on-line at [www.tamu.edu/admissions/catalogs/](http://www.tamu.edu/admissions/catalogs/).

Requirements Leading to the Master of Science Plant Breeding Distance Degree – Non-Thesis Option

- *36 graduate credit hours beyond the B.S. degree; general requirements are:
  - 32 course hours approved by the student’s Graduate Advisory Committee and the Office of Graduate Studies.
  - Statistics 651 or equivalent
  - Graduate Agronomy seminar (1 hr).
  - 4 hours of SCSC 684 (Professional Internship)
- No more than 9 hours of upper level (300 or 400) undergraduate courses and no graduate credit for the following courses required for a B.S. degree:
  - SCSC 101
  - SCSC 105
  - SCSC 301
- See Graduate Catalog for additional requirements, [www.tamu.edu/admissions/catalogs/](http://www.tamu.edu/admissions/catalogs/).
Requirements Leading to the Master of Science Plant Breeding Distance Degree – Thesis Option

*32 graduate credit hours beyond the B.S. degree; general requirements are:

a. 23 course hours approved by the student’s Graduate Advisory Committee and the Office of Graduate Studies.
b. Statistics 651 or equivalent.
c. Graduate Agronomy seminar (1 hr).
d. No more than 8 hours of SCSC 691 (Research) or SCSC 685 (Directed Studies).
e. No more than 9 hours of upper level (300 or 400) undergraduate courses and no graduate credit for the following courses required for a B.S. degree:
   SCSC 101
   SCSC 105
   SCSC 301
f. See Graduate Catalog for additional requirements, www.tamu.edu/admissions/catalogs/.

*A thesis written on original research as directed by student’s Graduate Advisory Committee.

Requirements Leading to the Doctor of Philosophy Degree

*64 graduate credit hours beyond the M.S. degree; general requirements are:

a. No set number of course hours is required; however, most Committee Chairs and Graduate Advisory Committees demand from 32 to 40 semester hours of classroom study, which usually includes courses in fields other than plant breeding.
b. Graduate Agronomy seminar (1 hr).
c. Students who accumulate more than 99 semester credit hours may be required to pay out-of-state tuition on any additional hours.
d. See Graduate Catalog for additional comments: www.tamu.edu/admissions/catalogs/.

*A dissertation written on original research as directed by the student’s Graduate Advisory Committee.

International Admission

International students enrolled in distance education are required to submit documentation to International Student Services (ISS) based on their location. For specific requirements please visit http://iss.tamu.edu/distance_learning/distance_learning.asp. ISS works with the Department to make sure all immigration issues are resolved fairly and quickly.

Language Requirement

Foreign nationals whose native language is not English are required to show English language proficiency. This is accomplished by [1] scoring at least 213 on the computer generated Test of English as a Foreign Language (TOEFL), 550 on the paper generated TOEFL, or 80 on the Internet Based form (iBT); or [2] scoring 6.0 on the IELTS; or [3] scoring 146 (400 old scale) or better on the verbal portion of the Graduate Record Exam (GRE); or [4] completing all 4 years of a B.S. degree at a U. S. university or college.
Continuous Registration
All students in graduate degree programs requiring a thesis, dissertation, internship, or record of study (i.e., all Soil and Crop Sciences graduate students) must be in continuous registration. This continuous registration includes graduate students who have completed all course work on their degree plans [other than SCSC 691 (Research) or SCSC 684 (Internship)]. Once all formal course work is completed and the student is not on assistantship/fellowship continuous registration is satisfied by registration for at least 1 credit hour during the Fall and Spring semesters. Summer semester registration is ONLY required if the student plans to take examinations or otherwise use University resources or facilities, or defend their thesis or dissertation.

Graduate students receiving financial assistance from the Department or through University scholarships must register for 9 credit hours during each of the Fall and Spring semesters, and 6 hours during the Summer (either 6 hours during the 10-week session or 3 hours in each of the 5-week sessions). This constitutes full-time status. Students who are self supported are not required to meet these guidelines.

**NOTE:** INTERNATIONAL STUDENTS may have additional requirements and should consult with International Student Services (979-845-1824) to ensure that they are in compliance with immigration requirements and enrollment status.

**NOTE:** SELF SUPPORTED STUDENTS are not required to register during the summer sessions regardless of whether or not they have completed their formal course work.

Progress Towards Degree
All distance education students enrolled in a degree program in the Soil and Crop Sciences Department are required to complete 9 semester credit hours per academic year (total of Fall, Spring, and Summer semesters) to ensure they are making adequate progress towards their degree.
Steps Leading to a Distance Education Master of Science Degree (Non-Thesis Option) in Plant Breeding

There are several steps that must be successfully completed to fulfill the requirements for the M.S.- NTO Plant Breeding degree in Soil and Crop Sciences. These include:

Communicate with Department Graduate Coordinator, Dr. Wayne Smith
Submit pre-screening application materials directly to Dr. Wayne Smith, Associate Department Head, Department of Soil and Crop Sciences, 2474 TAMU, College Station, TX 77843-2474. These include:

- A statement providing sufficient background information to demonstrate the student’s aptitude for and interest in plant breeding
- Overview of expected internship location and responsibilities. This will typically be at the student’s current employer. Students are required to secure their own internship appointment.

After pre-screening materials are received by the department, students should apply for admission to Texas A&M University. The Office of Graduate Admissions converts all information to electronic format and notifies the Department of the application. Once the student’s application and letters of recommendation are received, the student’s information is circulated to the appropriate faculty. A student is accepted for graduate study only if a faculty member can be identified who will serve as the student’s Graduate Advisory Committee chair.

English Language Requirements
INTERNATIONAL STUDENTS must score 213 (computer) on the TOEFL or 80 on the Internet Based form (iBT), 6.0 on the IELTS, or 146 on the verbal portion of the GRE to be accepted into the Distance Plant Breeding and Genetics Program.

Establish Advisory Committee
Students should, in consultation with their committee chair, identify appropriate faculty in both Soil and Crop Sciences and other departments to serve as members of their Graduate Advisory Committee. This should be accomplished as soon as possible, preferably in the student’s first long semester, as the committee will aid in planning the student’s internship and course work leading to their degree. One member of the advisory committee must be from a major other than those awarded in the Department of Soil and Crop Sciences. All members must be members of the Graduate Faculty.

Submit a Degree Plan
In consultation with their advisory committee, students MUST submit a degree plan that identifies the courses leading to the M.S. degree. The degree plan (http://ogs.tamu.edu) must be approved by the student's Graduate Advisory Committee, Dr. Wayne Smith, and the Office of Graduate Studies. The degree plan must be submitted to OGS before the end of the student’s second long semester and no later than 90 days prior to final oral or thesis defense. Failure to do so will result in a registration block being placed on the student by OGS. This is an on-line process initiated by the student after consultation with their advisory committee.
Graduate Policies and Procedures

**Complete Internship**
Upon completion of the internship (or its equivalent) the student will develop a written report of activities and accomplishments and submit that report to their Graduate Advisory Committee. Concurrently, the student will petition OGS for permission to hold a final defense and upon gaining approval will meet with their committee and discuss the written document. A report of results will be submitted to OGS.

**Submit Request to Schedule Final Exam**
The request to schedule the student’s thesis defense must be submitted to the OGS (http://ogs.tamu.edu) at least 10 working days prior to the exam. There may be additional time requirements posted on the OGS calendar. The request must be approved by the student’s Graduate Advisory Committee chair, co-chair, and Dr. Wayne Smith - Graduate Coordinator.

The exam results must be returned to OGS within 10 working days of the scheduled date of the exam.

**Apply for Degree and Pay Graduation Fees**
These items must be accomplished during the first week of the student’s final semester. Students should note this and all deadlines on the OGS (http://ogs.tamu.edu) calendar.

The steps leading to an M.S. NTO degree are illustrated on the following page.
Summary of Steps to Fulfill Distance Education Master of Science in Plant Breeding (Non-Thesis Option)

NOTE: student must be continuously registered until all degree requirements are met.

Steps Leading to a Distance Education Master of Science Degree (Thesis Option) in Plant Breeding

There are several steps that must be successfully completed to fulfill the requirements for the distance M.S. (TO) degree in Plant Breeding in Soil and Crop Sciences. These include:

**Communicate with Department Graduate Coordinator, Dr. Wayne Smith**
Submit pre-screening application materials directly to Dr. Wayne Smith, Associate Department Head, Department of Soil and Crop Sciences, 2474 TAMU, College Station, TX 77843-2474. These include:
- A statement providing sufficient background information to demonstrate the student’s aptitude to conduct plant breeding research;
- Identification of the area of plant breeding research to be pursued and its importance to the agricultural industry;
- A one or two page letter of support from the prospective distance co-chair indicating commitment of facilities and time for the conduct of proposed research.

Once a student has applied for admission to Texas A&M University, the Office of Graduate Admissions converts all information to electronic format and notifies the Department of the application. **Letters of recommendation may be mailed directly to Dr. Wayne Smith, Associate Department Head, Department of Soil and Crop Sciences, 2474 TAMU, College Station, TX 77843-2474.** Once the student’s application and letters of recommendation are received, the student’s information is circulated to the appropriate faculty. A student is accepted for graduate study only if a faculty member can be identified who will serve as the student’s Graduate Advisory Committee chair.

**English Language Requirements**
INTERNATIONAL STUDENTS must score 213 (computer) on the TOEFL or 80 on the Internet Based form (iBT), 6.0 on the IELTS, or 146 on the verbal portion of the GRE to be accepted into the Distance Plant Breeding and Genetics Program.

**Establish Advisory Committee**
Students should, in consultation with their committee chair and co-chair, identify appropriate faculty in both Soil and Crop Sciences and other departments to serve as members of their Graduate Advisory Committee. This should be accomplished as soon as possible, preferably in the student’s first long semester, as the committee will aid in planning the student’s research and course work leading to their degree. One member of the advisory committee must be from a major other than those awarded by the Department of Soil and Crop Sciences. All members must be members of the Graduate Faculty.

**Submit a Degree Plan**
In consultation with their Graduate Advisory Committee, students MUST submit a degree plan that identifies the courses leading to the M.S. degree. The degree plan (http://ogs.tamu.edu) must be approved by the student’s committee, Dr. Wayne Smith, and the Office of Graduate Studies. The degree plan must be submitted to OGS before the end of the student’s second long semester and no later than 90 days prior to their thesis defense. Failure to do so will result in a registration block being placed on the student by OGS. This is an on-line process initiated by the
student after consultation with their advisory committee.

Submit a Thesis Proposal
In consultation with their Graduate Advisory Committee, students MUST submit a thesis proposal that identifies the research problem which the student has been assigned, a partial literature review of the problem, objectives of the research, and the student’s approach to the research. The thesis proposal (http://ogs.tamu.edu) must be approved by the student’s committee, Dr. Wayne Smith, and the Office of Graduate Studies. The document MUST be submitted no less than 15 days prior to the submission of the Request for the Final Examination.

Apply for Degree and Pay Graduation Fees
These items must be accomplished during the first week of the student’s final semester. Students should note this and all deadlines on the OGS (http://ogs.tamu.edu) calendar.

Submit Thesis to Advisory Committee (Thesis Option Only)
Well before submitting a request to schedule the thesis defense, students should meet with their committee chair and confirm that all course work is completed or will be complete in an appropriate manner. INTERNATIONAL STUDENTS should confirm with their committee chair that all English language requirements have been completed. When all course work and English language requirements are satisfied, the student may submit his/her thesis to their committee.

Submit Request to Schedule Final Exam
The request to schedule the student’s thesis defense must be submitted to the OGS (http://ogs.tamu.edu) at least 10 working days prior to the exam. There may be additional time requirements posted on the OGS calendar. The request must be approved by the student’s Graduate Advisory Committee chair, co-chair, and Dr. Wayne Smith - Graduate Coordinator.

The exam results must be returned to OGS within 10 working days of the scheduled date of the exam.

Submit Thesis
Upload one approved final copy of the thesis as a single .PDF file (thesis.tamu.edu) and submit a signed approval page to the Thesis Office (Evans Library, 845-2225). Students should check the OGS calendar for semester deadlines relative to submission and graduation. The thesis must be approved by the student’s Graduate Advisory Committee and Dr. Wayne Smith.
### Summary of Steps to Fulfill Distance Education Master of Science (Thesis Option) Degree in Plant Breeding distance in Soil and Crop Sciences

Steps Leading to a Doctor of Philosophy

There are several steps that must be successfully completed to fulfill the requirements for the Ph.D. degree in Soil and Crop Sciences. These include:

Communicate with Department Graduate Coordinator, Dr. Wayne Smith
Submit pre-screening application materials directly to Dr. Wayne Smith, Associate Department Head, Department of Soil and Crop Sciences, 2474 TAMU, College Station, TX 77843-2474. These include:

- A statement providing sufficient background information to demonstrate the student’s aptitude to conduct plant breeding research;
- Identification of the area of plant breeding research to be pursued and its importance to the agricultural industry;
- A one or two page letter of support from the prospective distance co-chair indicating commitment of facilities and time for the conduct of proposed research.

Once a student has applied for admission to Texas A&M University, the Office of Graduate Admissions converts all information to electronic format and notifies the Department of the application. **Letters of recommendation may be mailed directly to Dr. Wayne Smith, Associate Department Head, Department of Soil and Crop Sciences, 2474 TAMU, College Station, TX 77843-2474.** Once the student’s application and letters of recommendation are received, the student’s information is circulated to the appropriate faculty. A student is accepted for graduate study only if a faculty member can be identified who will serve as the student’s Graduate Advisory Committee campus co-chair and a distance co-chair.

English Language Requirements
INTERNATIONAL STUDENTS must score 213 (computer) on the TOEFL or 80 on the Internet Based form (iBT), 6.0 on the IELTS, or 146 on the verbal portion of the GRE to be accepted into the Distance Plant Breeding and Genetics Program.

Establish Graduate Advisory Committee
Students should, in consultation with their committee co-chairs, identify appropriate faculty in both Soil and Crop Sciences and other departments to serve as members of their graduate advisory committee. This should be accomplished as soon as possible as the committee will aid in planning the student’s research and course work leading to their degree. One member of the advisory committee must be from a major other than those of the Department of Soil and Crop Sciences. All members must be members of the Graduate Faculty.
Graduate Policies and Procedures

Submit a Degree Plan
In consultation with their Graduate Advisory Committee, students MUST submit a degree plan that identifies the courses leading to the Ph.D. degree. The degree plan (http://ogs.tamu.edu) must be approved by the student’s committee, Dr. Wayne Smith, and the Office of Graduate Studies. The degree plan must be submitted to OGS before the end of the student’s fourth long semester and no later than 90 days prior to preliminary examination. Failure to do so will result in a registration block being placed on the student by OGS. This is an on-line process initiated by the student after consultation with their co-chairs and their Graduate Advisory Committee.

Review Prelim Eligibility Requirements
About the end of their fourth or fifth long semester and several weeks before they anticipate taking their prelims, students should review the eligibility requirements for the preliminary exam. Students should obtain the preliminary exam checklist form from the OGS homepage (http://ogs.tamu.edu). This checklist must be approved by the student’s advisory committee chair, and Dr. Wayne Smith - Graduate Coordinator. The checklist must be attached to the "report of exam results" and forwarded to the OGS after completion of the preliminary exams.

Announce Prelim Schedule
Once the student’s advisory co-chairs are satisfied that all prelim eligibility requirements have been met, the preliminary exam should be announced. The time frame from the first written exam until the oral exam should be approximately 3 weeks. Additional time requirements and deadlines are posted on the OGS calendar or in the graduate catalog. The announcement must be approved by the student’s committee co-chairs. A copy of the announcement should be provided to Dr. Wayne Smith - Graduate Coordinator.

Complete Prelims *
The results of the preliminary exams, written and oral, (see OGS homepage for the proper form - http://ogs.tamu.edu) must be returned to OGS within 10 working days of the oral examination. The Preliminary Exam Checklist must be attached. The results must be approved by the student’s Graduate Advisory Committee. All prelim exams, including the oral prelim, MUST be completed at least 14 weeks prior to the student’s dissertation defense.

Prelims can be completed via distance technology such as Skype, GoToMeeting, teleconference, etc. The forms must carry original signatures and thus should be signed by the Distance Co-chair and forwarded by the fastest means to the campus Co-chair and other committee members to sign and submit to OGS.

Submit a Dissertation Proposal
In consultation with their advisory committee, the student MUST submit a dissertation proposal that identifies the plant breeding problem which the student will research, a partial literature review of the problem, objectives of the research, and the student’s approach to the research. The dissertation proposal (http://ogs.tamu.edu) must be approved by the student’s Graduate Advisory Committee, Dr. Wayne Smith - Graduate Coordinator, and the Office of Graduate Studies. The document MUST be submitted no less than 15 days prior to the submission of the Request for the Final Examination.
Apply for Degree and Pay Graduation Fees
These items must be accomplished during the first week of the student’s final semester. Students should note this and all deadlines on the OGS calendar.

Submit Dissertation to Advisory Committee
Well before submitting a request to schedule the final exam, the student should meet with their committee co-chairs and confirm that all course work is completed, or will be completed in an appropriate time frame. When all course work is satisfied, the student may submit his/her dissertation to their co-chairs and then to the full Graduate Advisory Committee.

Submit Request to Schedule Final Exam *
The request to announce and schedule the student’s final exam must be submitted to the OGS (see OGS homepage for proper form—http://ogs.tamu.edu) at least 10 working days prior to the exam. There may be additional time requirements posted on the OGS calendar. The request must be approved by the student’s Graduate Advisory Committee co-chairs and Dr. Wayne Smith - Graduate Coordinator. **The results of the exam must be returned to OGS within 10 working days of the scheduled date of the exam.**

The final exam will/may be conducted by any appropriate Internet program or conference call. The results of the final should be signed by the distant co-chair and then forwarded by the fastest means to the campus co-chair to obtain the remaining signatures and submit to OGS within the 10 working day limit.

Submit Dissertation
Upload one approved final copy of the dissertation as a single .PDF file (thesis.tamu.edu) and submit a signed approval page to the Thesis Office. Students should check the OGS calendar for semester deadlines relative to submission and graduation. The dissertation must be approved by the Graduate Advisory Committee and Dr. Wayne Smith - Graduate Coordinator.

These steps leading to a Ph.D. degree are illustrated on the following page.
### Graduate Policies and Procedures

---

Revised—August 2012
Committee Structure

All distance graduate students will know their Graduate Advisory Committee co-chairs at the time they are admitted to the Department. In their first semester, students should consult with their co-chairs and establish their committee members. All committee members must be members of the Graduate Faculty at Texas A&M University. Faculty and other additional members can be appointed who are not members of the Graduate Faculty as Special Appointments. These Special Appointments can come from other universities, government agencies, or private industry. Special Appointments should bring specific expertise to the committee structure that will be advantageous to the student’s training and research. Special Appointees are “extra” appointments and do not count against the required number of committee members. Students should communicate with Dr. Wayne Smith for further information regarding special or “extra” committee appointments, if questions arise.

Master of Science committees are composed of the co-chairs and at least one additional voting member. One of the co-chairs must be a Soil and Crop Sciences Plant Breeding faculty member located at College Station. At least one of the remaining members must be from another TAMU major other than those awarded by Soil and Crop Sciences. Adjunct faculty from USDA or other agencies may serve as committee members representing the department to which they are adjunct if they are members of the Graduate Faculty.

Doctor of Philosophy committees are composed of the co-chairs and at least two additional members. One of the co-chairs must be a Soil and Crop Sciences Plant Breeding faculty member located at College Station. At least one of the remaining members must be from another TAMU major other than those awarded by Soil and Crop Sciences. Adjunct faculty from USDA or other agencies may serve as committee members representing the department to which they are adjunct if they are members of the Graduate Faculty.
Tuition and Applicable Fees (2012-2013)

Tuition - Resident
In Fall 2012, distance graduate students who are a resident of the state of Texas pay $226.55 / Semester Credit Hour in tuition.

Distance Education Teaching Fee – Non-Texas resident/International
In Fall 2012, nonresident and International students pay $489.55 per semester credit hour. Nonresident and International graduate students pay an additional $50.00 per semester credit hour. For a total tuition of $539.55 / SCH.

Distance Education Administrative Fee
This $30.00 per semester credit hour administrative fee is assessed to Non-Funded Out-of-State students taking distance education courses.

Distance Education Differential Tuition
$41.00 per semester credit hour is assessed to students taking courses using distance education resources.

University Advancement Fee
The University Advancement Fee is a required fee charged to all Texas A&M University students. The Advancement fee funds services such as advising, the Career Center, Writing Center, technology and libraries as well as administrative services such as ID services, the campus bus system, billing and refunds, access for students to discounted software and many of the services provided through the Division of Student Affairs.

International Student Orientation Fee
This $35.00 fee is a one-time fee charged to cover the cost of orientation programming for international students during their first semester of enrollment.

Late Penalties
Students who fail to pay fees and installments when due are assessed a $25.00 late payment fee for each payment or installment paid late.

Late Registration/Add Penalties
Students who register on or after the first day of classes, but before the thirteenth day of classes (fourth day for summer) are assessed a $100.00 late registration fee. Students who register after the twelfth class day are assessed a $200.00 late registration penalty (fourth class day for summer sessions). Students who add classes after the twelfth class day (fourth class day for summer) that result in a net increase in hours enrolled are assessed a $50.00 late add fee. This includes students who do not pay by these dates.

Reinstatement Fee
Students who fail to pay all fees by the last day of the semester will be administratively withdrawn from the University and charged a $50.00 reinstatement fee.
General Deposit
A deposit of $100 is required of every student to insure the institution against losses, damages, and breakage for which the student is responsible, or to be used to offset in part amounts owed by the student to the institution. General deposits are returned to students, less any such amounts owed to the institution, within a reasonable period after the date of the student’s withdrawal or graduation from the institution, not to exceed 180 days. The deposit retention period provides the University sufficient time to identify all amounts owed, and to determine if the student intends to enroll in the semester or summer session immediately following the student’s withdrawal or graduation or, if the student withdraws or graduates in the spring semester, in the next fall semester. If a student leaves the University without graduating or officially withdrawing, they must submit a written request to Student Business Services to receive a refund of their deposit. Deposits for students that do not graduate, withdraw or otherwise request a refund remain on file for four years. Those deposits are forfeited to the University’s General Deposit Scholarship Fund, after deducting any amounts owed to the University.
Graduate Resident Tuition and Fees Fall 2012/Spring 2013

This list does not include the following fees:

- Course related Educational Enhancement, Equipment Access, Lab and/or Field Trip Fees
- Property Deposit $100 fee for new, transfer, re-admitted students or ones without one on file.
- International Student Admin Fee of $200-$500—per semester charged to third-party sponsored students.
- Orientation Fees
